

- To **clean the footbed** wet the midsole and scrub in circles (try using a handful of non-bleach laundry powder and an old toothbrush).

To **clean the upper**:

- **Webbing**- wipe them with a damp cloth.
- **Patent leather**- wipe them with a damp cloth or special patent spray cleaner.
- **Leather**- we would only recommend using a special leather cleaner.
- **Suede or nubuck**- treat it with suede protection (*Woly Protector Spray*) to assure they keep their appearance, and as with any suede footwear, try not to get them wet.
- **Sequins or crystals**- wipe carefully with a dry cloth.
- **Synthetic**- wipe with a damp cloth.

DO NOT PUT IN THE WASHING MACHINE/DRYER OR SUBMERGE THEM IN WATER.
